

Database Analyst

Iovate is the maker of the MuscleTech family of products and the leader in the sports nutrition, diet and health supplements industry.

Opportunity:

Due to our rapid growth, Iovate Health Sciences Inc. is looking for a **Database Analyst** to join our IT team. The successful candidate will join our collaborative team of business-focused technology professionals. In this role you will proactively manage the availability, performance, data security, recoverability, and data integrity of our mission-critical, enterprise database technologies. You will also demonstrate your technology leadership by participating and/or mentoring others in database development projects performing analysis, design, development, and/or QA of new database technologies and ETL functions to support enterprise applications such as our Data Warehouse, ERP, MRP, and WMS systems.

Principle Accountabilities:

- Assist in the setup/configuration of new database systems and servers
- T-SQL, replication, ETL, SQL 2008 security access, server/SQL high availability
- Assist in development of Stored procedures, functions, reports, and integrations as required to support various line of business systems
- Monitor the operating environment and take corrective actions to optimize or tune performance
- Provide technology expertise for query, cube, and ETL development
- Proactively manage database security, auditing, and performance reporting
- Database software patching and upgrading
- Implement, monitor and manage daily database-level backup and restore activities
- Perform database analysis, data modeling, design, implementation, testing, and optimization
- Document and establish standard operating processes
- Analyzing and resolving problems associated with server hardware and applications software
- Assist in database project, capacity, and disaster recovery planning

Required Skills and Qualifications:

- Post-Secondary education in a related area
- Up to 5 years database administration experience in an enterprise environment
- Experience with Microsoft SQL databases (2008 preferred)
- Knowledge of Windows Server 2003, 2008
- Experience supporting a SharePoint database environment considered an asset
- SSAS, SSRS, and SSIS experience an asset
- Experience working/developing against Microsoft SQL back-ended business applications. (preference given to candidates with Microsoft Dynamics GP, Clarity and Accellos One experience)
- Working knowledge of Windows networks and active directory security
- Demonstrated problem solving, learning, communication and organization skills
- Demonstrated ability to write, and maintain technical documentation
- Excellent verbal and written English communication skills
